an intuitive algorithmic approach to probability and stochastic processes

decision theory and the theory of rational choice have recently been the subjects of considerable research by philosophers and economists however no adequate anthology exists which can be used to introduce students to the field this volume is designed to meet that need the essays included are organized into five parts covering the foundations of decision theory the conceptualization of probability and utility philosophical difficulties with the rules of rationality and with the assessment of probability and causal decision theory the editors provide an extensive introduction to the field and introductions to each part

this book brings together the personal accounts and reflections of nineteen mathematical model builders whose specialty is probabilistic modelling the reader may well wonder why apart from personal interest one should commission and edit such a collection of articles there are of course many reasons but perhaps the three most relevant are i a philosophical interest in conceptual models this is an interest shared by everyone who has ever puzzled over the relationship between thought and reality ii a conviction not unsupported by

empirical evidence that probabilistic modelling has an important contribution to make to scientific research and finally iii a curiosity historical in its nature about the complex interplay between personal events and the development of a field of mathematical research namely applied probability let me discuss each of these in turn philosophical abstraction the formation of concepts and the construction of conceptual models present us with complex philosophical problems which date back to democritus plato and aristotle we have all at one time or another wondered just how we think are our thoughts concepts and models of reality approximations to the truth or are they simply functional constructs helping us to master our environment nowhere are these problems more apparent than in mathematical modelling where idealized concepts and constructions replace the imperfect realities for which they stand

the figure of king solomon is central to our understanding of the history of israel and judah this volume of collected articles brings the reader up to date with the latest scholarship in the field the work consists of twenty four chapters and provides important studies in the historical approach to solomon and to 10th century b c e judah and israel with archaeological surveys of the neighboring regions sociological surveys and literary readings of the biblical texts with suggestions for further research and indexes

this study examines the speeches and prayers in the david solomon narrative in chronicles and seeks to demonstrate that the chronicler's portrayal of david and solomon attempts to establish the yehudite community's identity is the covenantal relationship still valid in the persian period the author asserts that as a commitment to yhwh involving the worship of yhwh through the jerusalem temple the covenantal relationship between yhwh and israel continues even into the persian period this study employs kennedy's rhetorical method with the new categories of the narrative situation and the chronicler's situation being used to further delineate his concept of the narrative situation the chronicler's portrayal of david and solomon through speeches and prayers serves to persuade his audience of the significance of the jerusalem temple reformulating the yehudite community identity as a cultic community in the persian period
